

## CLIMAS: CLIMAtE change citizens engagement toolbox for dealing with Societal resilience

Climate assemblies and Living labs are recognised as effective and rational instruments for **fostering deliberative democracy** in climate policy formation.

The objective of the CLIMAS project is to facilitate a shift towards climate resilience by providing a **cutting-edge, problem-focused climate adoption toolbox** to existing and future Climate Assemblies.

In 2023, the CLIMAS project was presented in events and conferences and hosted a series of workshop related to its core topics, **disseminating awereness on climate action and deliberative democracy**.

Keep reading for some highlights of year 1:

Let the **CLIMATE STORIES** begin!

Over the coming months, immerse yourself in a series of **posts on Instagram** featuring excerpts from video interviews collected around Europe from diverse people committed to deliberative democracy as a tool for climate adaptation.

## An assembly of 100 citizens from the region of Catalunya

Catalonia launches an assembly of 100 citizens to present a list of proposals to the Govern de la Generalitat to contrast climate change. In addition to voting, the Citizens' Assembly **will contribute to the definition of relevant public policies**, with the aim of **better involving citizens in democratization process** of the country. The Assembly aims to **raise awareness of the climate emergency**.

**Don't miss the call**

## OPEN CALL

# Citizen Science Projects for Citizen Climate Assemblies

Your project could be featured in upcoming Climate Assemblies where communities and citizens deliberate to shape climate policies.

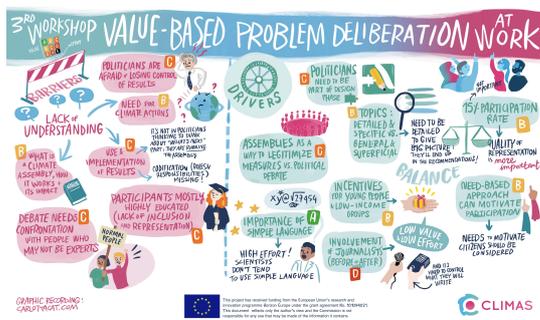

As part of the CLIMAS toolkit for citizen climate assemblies, we are seeking citizen science projects that can be used to engage citizens in climate action and inform policy decision.

**Submit your citizen science project before the 31st of March!**
